Trailer Telematics Dashboard

Real-time, remote monitoring, management,
and data analytics—all at your fingertips.

Gain full visibility into your production trailers—whether you want to check the battery status of a single unit or analyze energy data across your entire fleet.

Transportation Coordinators

Streamline trailer management and reduce downtime.

With one easy snapshot, you can view the status of every trailer—battery levels, system alerts, and more. Set up custom email notifications for low batteries and other key issues to reduce the time spent on manual checks and stay ahead of potential problems.

Sustainability Teams

Your on-demand source for environmental impact data.

Track solar energy generation, estimate avoided greenhouse gas emissions, and pull actionable data without ever needing to step on set. Our dashboard delivers the insights you need for sustainability reporting—efficiently and remotely.
